

## Overview

Either as a follow on from our Phoenix Close Protection course or stand alone, the Enhanced Close Protection Driving course is designed to enable drivers who are part of a Close Protection team to progress safely through a range of challenging situations whilst maintaining the high level of security awareness required. Through a series of training modules and practical exercises, drivers will learn how to mitigate the risks to safety and security whilst maintaining control of a vehicle at speed

Students will learn the instinctive, defensive and evasive driving skills that form part of the Surveillance Detection and Instinctive Driving (SDID) course, we well as the specialist driving skills required by members of a close protection team.

## The course

The course is conducted over a three day period at our training facility in Pershore, Worcestershire and is accredited by the professional awarding body 'Skills for Security'. Our team of highly experienced instructors are former UK Special Forces and police personnel who have recognised civilian teaching qualifications such as the City & Guilds 7303 Adult Learners course, as well as recent operational experience. Their proven capabilities and our facilities ensure we deliver a learning experience to enable security professionals to demonstrate a high level of certifiable driver training.

## Syllabus

### Instinctive driving

- Situation awareness and surveillance Detection
- Travel pattern analysis and area of predictable travel
- Instinctive and high speed driving practical skills
- Emergency situation drills
- Accident management
- Vehicle dynamics and control
