Six key reasons to reject the Offer

G4S is a global leader in security services

Unmatched market footprint, strong brand and industry-leading capabilities

G4S is at an inflection point, well positioned to accelerate profitable growth and deliver sustainable free cash flow

Timing of GardaWorld's Offer is highly opportunistic

190p per share significantly undervalues the business

GardaWorld & BC Partners desperately need G4S, which should not be at your expense

29 October 2020

Dear Shareholder,

On 30 September 2020, GardaWorld & BC Partners made an unsolicited Offer for G4S plc which seeks to capture your Company at just 190 pence per share. Your Board has unanimously rejected this inadequate Offer and we believe that you should reject it too.

On behalf of the Board of G4S, I am writing to you to set out why:

1. G4S is a focused global leader in security, with leading market positions and outstanding technology capabilities;
2. G4S has excellent prospects and is well positioned to accelerate profitable growth and deliver sustainable free cash flow;
3. the timing of the Offer is highly opportunistic and significantly undervalues your business; and
4. GardaWorld & BC Partners desperately need G4S and are seeking to address GardaWorld's weaknesses at your expense

Shareholders are strongly advised to take absolutely no action in relation to this wholly unattractive and opportunistic Offer.

G4S has been fundamentally repositioned to address long-term growth in global security markets

Today G4S is a focused global company with an unmatched market footprint, delivering strong operating and financial performance.

Through significant portfolio action over recent years, the Board and Management have fundamentally repositioned G4S as an industry-leading global security company, with 93% of our PBITA (from 76% in 2013) now derived from our Secure Solutions business. The successful sale of the majority of our Conventional Cash business in February 2020 represented a major milestone on this journey, enabling G4S to focus on growing its Integrated Security business. Our Integrated Security offering combines our risk consulting expertise, security professionals, technology and data analytics. G4S's innovative and unique approach manages risks and enhances value for our customers and supports our revenue growth, customer loyalty and superior margins.

Management has also resolved and settled a range of large complex legacy issues and onerous contract exposures, whilst implementing strong risk management controls and systems. As a result, there have been no new onerous contracts since 2013.

G4S operates in growing secure solutions markets and it does so from a position of great strength with an unmatched geographic presence, a strong global brand, market-leading operating capabilities and leading health and safety performance. Our strategic advantage is evident in the world's largest and most competitive security market, North America, where G4S delivered organic revenue growth of 10% in 2019 and 6% in the first six months of this year, despite the global pandemic.

In recent years, Management has also created a market-disrupting business in Retail Cash Solutions, which has a very strong pipeline of orders and is growing rapidly and disrupting traditional cash services.

As a result of the investment we have made in Integrated Security and retail technology, G4S is able to offer industry-leading solutions to our customers and, as a result, already has higher margins than most of our security competitors. Our strategy and current performance give us confidence in our ability to further increase our margins.

We believe that the Company is extremely well-positioned to maximise future performance and that, as shareholders, you should be the ones to benefit both from our enhanced focus but also from the significant investment in recent years to strengthen our position, performance and prospects. These benefits are increasingly evident in G4S's results, having retained and won contracts with an annual contract value of £2bn and achieved year-on-year growth in earnings during the first nine months of 2020. Delivering this performance in the midst of a devastating pandemic clearly demonstrates the strength of G4S and is a great tribute to the Management and employees of your company.

Please refer to page 44 for bases and sources.

G4S has a clear set of strategic priorities to drive value for shareholders and key stakeholders

Following the significant re-shaping of the Company's business portfolio in recent years, we now have an attractive business mix with a growing proportion of higher value integrated security services. Alongside this, G4S has made significant progress in reducing its direct and indirect costs and expects to deliver £100m of cost savings in 2020.

G4S is strongly positioned and, in line with our increased confidence, we are updating the Company's medium-term financial targets:

- i. Revenue growth at 4-6% per annum;**
- ii. PBITA margins of 7%⁽¹⁾;**
- iii. Free cash flow of >£1bn over the next 5 years (2021-25)⁽¹⁾;**
- iv. Sustainable dividends attaining 2.0x cover once the uncertainty surrounding the pandemic has reduced to an acceptable level⁽²⁾; and**
- v. An investment grade balance sheet with leverage of 2.0x-2.5x net debt to Adjusted EBITDA**

Our confidence in delivering these updated targets is underpinned by the strength of our global blue-chip customer base and diverse pipeline supporting our revenue growth; by our growing capability in the delivery of higher margin Integrated Security; and by the digitisation of our operations and services.

G4S's strategy and financial targets are consistent with an investment grade balance sheet and a prudent approach to leverage. G4S has continued to significantly strengthen its net debt to Adjusted EBITDA ratio to 2.58x as at 30 June 2020 (from 3.4x as at 31 December 2015). Confidence in our future cash-flows underpin our capital allocation priorities of disciplined investment, shareholder returns and deleveraging.

G4S also has a strong and long-standing relationship with its Pension Trustees, having made long-term and responsible contributions. The UK Pension Scheme had a net deficit of £0.3bn (at the end of 2019), which is being reduced by a planned programme of reliable company contributions agreed with the Pension Trustees and underpinned by the Group's covenant and investment grade balance sheet.

As a responsible employer our priorities embrace sustainable investment to secure the health and safety of our employees and this is reflected in the tremendous improvement in our health and safety performance over the past seven years.

GardaWorld's Offer significantly undervalues your company – it is nowhere near a full and fair price

The timing of GardaWorld's proposal is highly opportunistic and significantly undervalues your company.

When GardaWorld & BC Partners first approached G4S in June 2020, UK equity prices, including G4S's, were already severely depressed by the global pandemic. Since that time, the broader UK market has traded at its greatest valuation discount to global equities for 20 years.

In stark contrast, BC Partners, now the majority shareholder of GardaWorld, paid a multiple of 11.2x LTM EBITDA for its acquisition of GardaWorld in 2019. The Offer for G4S is very significantly below this value at 7.7x LTM EBITDA, despite G4S being a far superior business.

In addition, the 190 pence per share Offer also:

- i. fails to provide G4S shareholders with fair value for the significant operating synergies available to GardaWorld across overlapping geographies and the combined cost base of £8.7bn; and**
- ii. fails to reward shareholders for the very substantial financing synergies that would accrue to GardaWorld by gaining access to G4S's balance sheet and robust, diverse cash flows.**

Please refer to page 44 for bases and sources.

(1) Aspirational target which should not be construed as a profit forecast or interpreted as such.

(2) As stated in the H1 2020 Interim Results, dividend to resume once the uncertainty surrounding the pandemic has reduced to an acceptable level in line with our previously stated policy of attaining dividend cover of 2.0x and a progressive dividend thereafter.

GardaWorld & BC Partners desperately need G4S in order to realise their ambitions

BC Partners' acquisition valued GardaWorld at C\$5.2bn and BC Partners now has a controlling interest in a business that has been heavily lossmaking and lacks financial strength. GardaWorld & BC Partners desperately need access to G4S's balance sheet and strong cash flows in order to finance this acquisition, and their acquisition-fuelled growth strategy. Meeting their needs should not be at the expense of our shareholders and key stakeholders.

GardaWorld also lacks global scale and coverage and acquiring G4S at a discount to fair value would allow them to own a clear global leader in Security – at your expense.

GardaWorld has quite simply failed to articulate why your company's employees and stakeholders should support an acquisition that would be over ten times the size of GardaWorld's largest acquisition to date. Furthermore, in all of its communications GardaWorld has been conspicuously non-committal about the future of G4S's non-UK employees, which represent c.95% of our workforce.

TAKE NO ACTION

Your Board believes that G4S has a bright future as an independent company underpinned by:

- i. Our position as a global leader in security;
- ii. Clear financial targets;
- iii. Resilient trading performance this year; and
- iv. Re-rating potential now the business is refocused,

all of which we believe will contribute to significant shareholder value well in excess of the Offer.

Your Board, which has been so advised by Citi, J.P. Morgan Cazenove, Goldman Sachs and Lazard (the “Financial Advisers”) as to the financial terms of the Offer, believes that GardaWorld’s Offer significantly undervalues G4S. In providing their financial advice to the Board, the Financial Advisers have taken into account the Board’s commercial assessments. Citi is providing independent financial advice to the Board for the purposes of Rule 3 of the City Code.

Accordingly, the Board unanimously recommends that you reject the Offer. Your Directors will not be accepting GardaWorld’s Offer in respect of their own beneficial shareholdings.

The rest of this document explains in more detail why we, the Board of G4S, believe that this Offer is thoroughly inadequate. We hope you find it interesting and illuminating.

Yours sincerely,

- GardaWorld says it has a definitive plan for pensions but no such plan has been agreed with the Pension Trustees
- GardaWorld's high leverage and sub-investment grade balance sheet increases risk for pension scheme members and will likely require substantial additional funding

6 Effects of the Offer on G4S's interests

- 6.1** On giving its opinion on the Offer, the Code requires the Board to give its views on: (i) the effect of implementation of the Offer on all of G4S's interests, including, specifically, employment; and (ii) GardaWorld's strategic plans for G4S and their likely repercussions on employment and the locations of G4S's places of business, as set out in the Offer Document.
- 6.2** The Board notes the statements made by GardaWorld on pages 18 and 19 of the Offer Document, in particular, relating to its plans for the UK head office and its future role. The Board notes that, notwithstanding that GardaWorld has operations in many of the countries in which G4S operates, GardaWorld has only made extremely limited and caveated disclosures of its intentions in relation to the vast majority of G4S's businesses and 530,000 employees across 6 continents. The Board notes that "GardaWorld intends to maintain operational staff at current levels unless and until existing contracts change" and that GardaWorld's stated intention not to make any material change to the conditions of employment of, or the balance of skills of, the employees of the Group is subject to the outcome of a planned post-completion review. The statements made by GardaWorld are therefore not sufficiently detailed or are subject to such caveats that there is insufficient information in the Offer Document about GardaWorld's plans in relation to G4S for the Board to give detailed views on such plans.

7 Material Contracts

The following contracts have been entered into by G4S or its subsidiaries otherwise than in the ordinary course of business since 14 September 2018 (the date two years prior to the commencement of the Offer Period in relation to the Offer) and are or may be material:

7.1 Agreements relating to the sale of the majority of G4S's Conventional Cash handling businesses

On 26 February 2020, G4S and The Brink's Company ("**Brink's**") entered into three sale and purchase agreements and a put option deed (the "**Sale Agreements**") pursuant to which Brink's will acquire the majority of G4S's Conventional Cash handling businesses and G4S's international logistics business. The sale to Brink's did not include the UK cash solutions business, the South African cash business or G4S's payment and cash technology business, which owns Retail Cash Solutions, Cash360, Deposita and G4SPay.

Under the Sale Agreements, G4S will receive net cash proceeds of approximately £670 million and assign approximately £60 million of net liabilities to Brink's.

As of the date of this document, G4S has completed and received approximately 83% of the proceeds anticipated from the sale. The substantial majority of the remaining completions are scheduled to occur during the remainder of 2020.

7.2 Serious Fraud Office Deferred Prosecution Agreement

In July 2020, G4S Care and Justice Services (UK) Limited ("**G4SCJS**"), a subsidiary of G4S, entered into a deferred prosecution agreement (the "**DPA**") with the UK Serious Fraud Office (the "**SFO**"). The DPA relates to the investigation initiated by the SFO in November 2013 in relation to G4SCJS's electronic monitoring contracts with the UK Ministry of Justice.

Under the DPA, G4SCJS has taken responsibility for three offences of fraud between August 2011 and May 2012 related to financial reporting to the UK Ministry of Justice under those contracts and will not be prosecuted subject to fulfilling certain requirements, including paying a financial penalty of £38.5 million (which reflects a 40% discount applied due to G4SCJS's substantial cooperation with the SFO's investigation) and making a payment of £5.9 million in respect of the SFO's costs. The financial penalty and the SFO's costs were paid in August 2020.

7.3 California class action settlement agreement

On 22 January 2019, G4S Secure Solutions (USA) Inc., a subsidiary of G4S, entered into a settlement agreement in relation to an employee class action in California (the "**Settlement Agreement**"). The Settlement Agreement was in full and final settlement of a class action relating to claims for meal and rest breaks for the period of 2001 to 2010 in California.

The amount payable under the Settlement Agreement was between US\$100 million and US\$130 million with the final amount to be determined during the settlement administration process. The Settlement Agreement was approved by the Superior Court of the State of California in October 2019. The amount finally paid was US\$110m (£87m).

7.4 Revolving Credit Facility

General

G4S is party to a £650 million multi-currency revolving credit facility agreement (the "**RCF**"), with a group of lenders and Bank of America Merrill Lynch International Designated Activity Company as agent. The RCF is available for G4S's general corporate purposes. As of the date of this document, the RCF is fully undrawn.

The RCF (originally a £750 million facility) was entered into on 7 January 2015, and amended and restated on 10 August 2018. The RCF was originally due to mature on 10 August 2023. In July 2019 G4S exercised an option to extend the term of £716 million of the £750 million RCF by a further year, taking it to 2024.

On 26 March 2020, G4S further amended the RCF, cancelling £100 million. On 22 May 2020, G4S exercised the second option to extend the term of the £650m RCF by a further year, resulting in £136 million maturing in 2024 and £514 million maturing on 10 August 2025.

Borrowers and Guarantors

The borrowers under the RCF are G4S and G4S International Finance plc and it is guaranteed by G4S, G4S Secure Solutions (USA) Inc., and G4S Holding One, Inc..

Interest Rates and Fees

The interest rate on borrowings under the RCF is calculated based on LIBOR (or in the case of loans in euro, EURIBOR), plus a margin between 0.40 per cent. per annum and 1.00 per cent. per annum based on G4S's consolidated net debt to consolidated EBITDA ratio.

Interest on borrowings is payable on the last day of each interest period, or every six months for borrowings with an interest period exceeding six months. The borrower is also obliged to pay a commitment fee equal to 35 per cent. of the applicable margin per annum on the lenders' undrawn commitments and a utilisation fee ranging between 0.10 per cent. and 0.40 per cent. depending on the balance drawn under the RCF.

Financial Covenants

Availability of amounts under the RCF is subject to compliance with a financial covenant in relation to G4S's consolidated net debt to consolidated EBITDA ratio. This financial covenant is tested semi-annually.

Change of control

In the event of a change of control of G4S, the terms of the RCF require prompt notification of the change of control event, following which the lenders are entitled to cancel their commitments and demand repayment of outstanding funds utilised, with the repayment required to be made within 45 days.

Undertakings

The RCF contains negative covenants which, subject in each case to certain customary exceptions and materiality thresholds, include among others, restrictions on: the granting of security, disposing of assets, incurring financial indebtedness, any acquisition that would constitute a "Class I transaction" as defined in the Listing Rules, a substantial change to the general nature of the business of the Group, and making the proceeds of the RCF available to any person who is the subject of sanctions.

The RCF also contains affirmative covenants which, subject in each case to certain customary exceptions and materiality thresholds, include among others: mandatory periodic reporting of financial information, notice upon the occurrence of events of default, *pari passu* ranking, compliance with laws, and obtaining of necessary authorisations.

7.8 Covid Corporate Financing Facility

On 29 April 2020, G4S accessed £300 million through the HM Treasury and Bank of England lending facility, the Covid Corporate Financing Facility ("**CCFF**") through its subsidiary G4S International Finance plc. The CCFF is designed to support liquidity among larger firms, helping them to bridge coronavirus disruption to their cash flows through the purchase of short-term debt in the form of commercial paper.

8 Pension Scheme

The Pension Scheme provides, *inter alia*, final salary pension benefits in respect of current and former employees of the Group. The Pension Scheme comprises three segregated sections: the Securicor Section, the Group 4 Section and the GSL Section. Both the Securicor Section and Group 4 Section are closed to new members and future accrual of benefits.

Under the trust deed and rules of the Pension Scheme, the Pension Trustee has certain powers which are triggered by a "Takeover Event" which are designed to enable the Pension Trustee to take steps to protect the Pension Scheme. These powers include, *inter alia*, the power for the Pension Trustee to unilaterally set employer contribution rates in respect of the Securicor and GSL Sections (the Pension Trustee already had this power in respect of the Group 4 Section). The unsolicited approach and Offer by GardaWorld has triggered these powers for the Trustee.

G4S has a good relationship with the Pension Trustee that has been established over a number of years (during which time successive funding agreements have been reached without the need for the Pension Trustee to have recourse to its existing unilateral powers in respect of the Group 4 Section). G4S has been, and continues to be, in discussions with the Pension Trustee regarding the funding and security arrangements for the Pension Scheme.

APPENDIX III
OPINIONS FROM THE G4S EUROPEAN WORKS COUNCIL AND THE GMB UNION

Opinion from Employee and Worker Representatives of the G4S European Works Council (EWC)

You will be asking yourself the question: **Who wants the business most to succeed?** We, G4S's employee representatives from across Europe, are asking the same question.

After all, we have dedicated our lives to this company. Many of us are the first ones to get the company started in the early hours of the mornings and the last ones to close the doors of sites and buildings across Europe and the rest of the world. We are central to the business's day-to-day operations, its revenues, and business resilience in these uncertain times.

As G4S employees on the frontlines – and even shareholders – in many cases, we are committed to doing a decent job and the long-term success of the business. That is why we see this 'hostile takeover bid' as an opportunity to modernise employment relations so that the business can become a true global leader going forward.

We would appreciate that all parties consider our expertise, suggestions and proposals when arriving at a decision on the future of G4S. We also look forward to a written response by the G4S Board and GardaWorld's Stéphan Crétier.

- **Company Growth:** In our view, neither GardaWorld nor G4S management sufficiently explain how they plan to increase value and achieve organic growth in the saturated and extremely competitive European private security market. Keeping pace with recent market and legislative developments will be fundamental to overcome the company's impasse in Europe. Its geographic footprint and market leadership should be used to advocate that public authorities and private clients purchase security services based on 'quality' and social criteria. To eliminate bottom-feeders in the market, management, trade unions and worker representatives should develop a joint approach to lobby for tighter regulation of the private security sector.
- **Restructuring:** We note that management has conducted several waves of restructuring. Despite well-known health, safety, and well-being concerns, we have done our best to implement management's goals. Our day-to-day work shows that it is impossible to continue the course of increasing our workloads in the hope of achieving higher margins. We are not opposed to business restructuring on principle if it secures our long-term employment and leads to a higher recognition of our work. To modernise employment relations within the business, we ask that a joint management-employee committee is established to create an impact assessment for any future restructuring programme.
- **Job Security:** We call both parties to commit to securing employees' jobs as well as our existing terms and conditions. We acknowledge that GardaWorld commits itself to 'securing jobs' in the UK. However, we would ask GardaWorld to make similar commitments where G4S currently operates. We also ask G4S to make the same commitment. The market leadership that both parties strive for can only be achieved by addressing the high levels of labour turnover and giving us employees a long-term career perspective within the company. We would ask that management use the above-mentioned committee to develop and monitor a five-year plan on the issues of employee, client retention as well as career development.
- **EU legislation:** It seems that GardaWorld has done their homework on G4S but we wonder whether it has done so in regard to EU legislation, the EU's private security market and its players. Has GardaWorld taken note of The Transfers of Undertakings Directive 2001/23/EC, which would apply in the case of a takeover? Has GardaWorld assessed how it will abide to national legislation for private security operators, and national merger codes in different EU countries? We invite you to use our unions' and works councils' expertise and knowledge on these issues. We propose to develop joint approaches to ensure smooth business operations, and the company meets the legal requirements. Most importantly though concrete actions need to be taken that the company becomes a high-road employer.
- **Human Rights Risks:** We deeply encourage shareholders to engage in due diligence concerning both GardaWorld's, G4S's environmental, social, and governance factors. In both companies we find on-going unresolved human and labour rights issues. As these represent an imminent danger to the companies' brands, reputations and their long-term business success, we strongly recommend that these issues be remediated as soon as possible. We also raise the question whether GardaWorld and the G4S board have prepared and taken necessary measures in the case that a European-wide due diligence law comes into effect. We see such a law as an opportunity for the business to distinguish itself from its competitors and would ask management to issue their public support for such a law as other market leaders in other sectors have done.
- **Trade Unions:** We appreciate that GardaWorld's 'firm offer' mentions us, the employees, and we note that Stéphan Crétier has approached the GMB Union. We would appreciate that a global leader also adopts a global approach to employment relations. We propose a modern approach to employment relations with regular social dialogue with worker representatives at the national, European, and global levels. This should also include transparent reporting of outcomes in the annual report, including a dedicated section for trade union representatives' views. This would strengthen management's accountability towards its share- and stakeholders and solidify the business's leadership for the future.

- **Social Dialogue and Collective Bargaining:** We recognize that G4S has a track record in participating in EU industrial relations, is an active member of CoESS, actively engages in Social Dialogue and collective bargaining with its employees. GardaWorld does not have a credible track record on these issues. As social partners, we have decades of experience in setting standards through collective agreements at company and sectoral level. Not only do we as employees rely on these agreements, but they also create value for all business stakeholders. We demand that both GardaWorld and G4S guarantee to uphold and extend existing collective agreements and deepen the company's approach to including employee representatives and trade unions in their strategic decisions at all levels. This agenda should be strengthened by funding an annual meeting of trade unions across the whole company's operations.
- **Information and Consultation Rights:** As employees we know the day-to-day operations of the business. As the EWC Recast Directive 2009/38/EC foresees, information and consultation rights should be mainstreamed in all decision-making. We ask that GardaWorld management commits itself to the recently agreed upon EWC agreement as the baseline and develops a modern approach. Our information and consultation rights should reflect the reality that all of us need to turn what-would-be the largest company into a true industry leader in all respects. At the same time, we urge G4S to use the EWC as management's sounding board to assess the implementation of its strategy and engage in a joint process to ensure information and consultation rights are guaranteed in the future.
- **Pension deficit:** GardaWorld's Stéphan Crétier wrote to the GMB that 'G4S's current and past employees deserve the certainty of their pension.' We are happy that GardaWorld has started to talk about the company's pension deficit. We hope that however shareholders may decide, that they will address it with the view of the company's long-term employees who have paid into the system and deserve their deferred pay. If G4S management is serious about the company's independence, it would be well placed to pledge their upcoming bonuses to narrow the gap in the first instance. We also suggest that the synergies that GardaWorld would evidently bring should be used to narrow the deficit in half the time and establish similar systems across Europe. This would set us apart from our competition and allow us to recruit the best employees.
- **Global Framework Agreement:** As European employee representatives, we appreciate that G4S has a global ethical employment partnership with UNI Global Union. Through UNI, we are in continuous exchange with representatives of the almost half a million employees across the globe. It is times like these that it becomes apparent that the ethical employment partnership with UNI Global Union should be honoured, expanded and backed up with robust due diligence procedures whoever assumes management in the years to come. To build on our previous work, we propose that the company set up a global fund which can enable that UNI Global Union and trade unions receive yearly dedicated resources to modernise employment relations within the company.

We believe that these considerations are of common interest to all parties involved: G4S, GardaWorld, the shareholders, and the company's employees and their representatives. Evidence has repeatedly shown the business benefits of improved workforce management practices. As one of the world's largest private sector employers, this is of utmost significance. Innovative employment relations – as suggested in this opinion – are foundational to enable smooth operations in the day-to-day, and to realise the improvements needed for the success of the company. We call on the management of G4S and GardaWorld to consider how our proposals and suggestions can be implemented in the future.

We also encourage shareholders to carefully assess these factors in their decision and voice strong expectations to management at both G4S and GardaWorld in their discussions of the offer. Doing so would be in the best interest of the company and its shareholders in the long-term, and in line with increasing investment stewardship expectations, and investors' human rights responsibilities.

Yours sincerely

 Jannick Pedersen (Denmark)
 Joost Stam (Netherlands)

 On behalf of the members of the G4S European Works Council.

Introduction:

GMB is the union for security workers in the UK. GMB is the largest recognised union in G4S's UK operations.

Our priority is securing the future of our members jobs and improving their quality of employment. We believe that G4S's current UK operations can emerge from the pandemic in a position of strength.

The GMB would welcome engagement from both G4S and GardaWorld management on their visions for the company's long-term future.

Securing employment:

G4S is a leading employer – the company accounts for around a quarter of private security jobs in the UK. It is deeply concerning that up to 1,150 jobs are at risk of redundancy in G4S's remaining cash handling business, without an assurance of redeployment elsewhere in the business.

We note that G4S recorded a profit before tax and dividends in each of the last five years and that the company recorded an underlying profit of £187 million in the first six months of the year before exceptional items (despite adverse trading conditions).

We do not believe that redundancies are inevitable, nor that the loss of skilled and experienced workers is the right strategic direction. We call on G4S and GardaWorld management to set out a clear plan for growing the company and securing employment in G4S.

The GMB believes that all workers should receive a real, living wage. The benefits of this to employers are well rehearsed; making it easier to attract new staff, raising morale, motivation, reducing absenteeism and sickness rates and improving employment relations.

The security industry has suffered from a 'race to the bottom', a strategy that does nothing to protect the longevity of a business with a loyal and committed workforce. We call for a commitment from both parties to ensure G4S becomes a living wage employer.

G4S runs a number of key strategic contracts within the public sector and yet the workforce on those contracts receive pay and conditions far below those enjoyed by the equivalent, directly employed workforce. GMB calls for a commitment from both parties to end two-tier discrimination and for a commitment to working with the public sector contracting bodies to deliver equal terms for all privately employed staff.

Maintaining the integrity of G4S's operations:

G4S has a strong employment profile across its Secure Solutions, cash handling, consulting, and technological segments. We believe that these segments are complimentary. The company and its workforce derive benefit from the worked experience of the diverse range of the UK's security industry. We are seeking a reassurance that, following the conclusion of the bidding process, the integrity of the G4S's operations will be maintained.

A sustainable future for the pension scheme:

It is not disputed that the G4S defined benefit pension scheme is in deficit. The deficit grew to £331 million in 2019 (an increase of 10 per cent on 2018). Although we note that this figure has more than halved between the 2012 and 2018 valuations.

The 26,000 members of the scheme deserve certainty over their security in retirement. This issue must be a priority for both G4S and GardaWorld management and we note that a number of deficit repair payments have been made.

GardaWorld has stated that: '*We intend to address the underfunded G4S UK Pension Scheme and ensure that the interests of the scheme are safeguarded.*' We would welcome engagement with GardaWorld to better understand the detail of its plan for the scheme and call for an assurance from GardaWorld that the employer covenant for the scheme will not be weakened if its bid succeeds.

Maintaining and extending good industrial relations:

In 2008, a ground-breaking global Ethical Employment Partnership agreement was signed between G4S, GMB, and UNI Global Union. The agreement sets out G4S's commitment to upholding good industrial relations and employment standards, and to abide by the ILO conventions. GMB holds a number of recognition agreements across G4S's UK business.

We note that the Offer Document states that:

'GardaWorld is focused on ensuring that any legal duties in relation to such arrangements [to engage with works councils, trade unions or other employee representative bodies] (including any duty to inform and / or consult about the Offer) are discharged.'

While it is important that statutory minimums are upheld, we are clear that – if the takeover were to proceed – the new management should uphold existing agreements and seek to extend them. We ask that GardaWorld commit to this.

Whatever the outcome of the current processes, good industrial relations at G4S could be deepened and codified through a national recognition agreement that builds on the principles of the Ethical Employment Partnership. We would welcome a commitment from both companies that they will work in good faith with the GMB to achieve this.

Conclusion:

Our members are seeking certainty during this process. GMB stands ready to play a constructive role as G4S, GardaWorld, and shareholders consider their position.
