G4S
An ALLIED UNIVERSAL® Company

At the core of our operations is the ability to combine the best of our people, risk, technology, and data services. We do this through transparency and a coordinated approach to serve our customers with end-to-end, flexible, and scalable integrated security solutions.

FOCUS

Our team has years of deep knowledge and understanding of the High-Tech and Telecommunications sector, and we remain focused on providing a comprehensive list of security solutions specifically tailored to your needs.

CUSTOMISED SOLUTIONS

With our Risk-Based Approach to security, we develop solutions for specific needs such as protecting intellectual properties or security operations centre monitoring and strategically deploy people, systems, and technology to minimise disruption and risk. We continuously evolve and evaluate our mitigation strategies to stay ahead of the threat.

SAFETY

Make your business, customers and visitors a priority while enhancing safety, satisfaction, mitigating risk, reducing workplace accidents and improving your security.

TRAINING

We provide personnel training services applicable to the technology sector including key areas such as Information Protection, Fire and Life Safety, First-Aid/CPR/AED, emergency preparedness and access control and management.

Our understanding of the High-Tech and Telecommunications sector fundamentals and our partnerships with some of the world's most well known companies, ensure we stay in tune with the industry's most recent news and developments - always enhancing your company's brand and providing peace of mind for those with who we interact.

STRATEGY

From our years of experience and fast networks of specialists, we understand the concerns and challenges business owners, property managers, and tenants face.

OUR COMMITMENT TO CUSTOMERS

► **Easy to do business with:** With proven tools and process we continue to find new ways to bring value to our customers

► **Unprecedented transparency:** Integrated business intelligence systems along with artificial intelligence driven workforce management tools provide our customers with unmatched insight into our services

► **The best hires for you:** Expanding our recruiting network, implementing sophisticated hiring tools and utilising the latest communication technologies ensure we support our customers with the most qualified, engaged, and motivated workforce

G4S INTEGRATED SECURITY

At the core of our business is the ability to combine the best of our people, risk, technology, and data services. We do this through transparency and a coordinated approach to serving our customers with end-to-end, flexible, and scalable integrated security solutions in any sector.

Applying a Risk-Based Approach

Identifying the right mix of services to deliver a truly integrated security solution

What do you **need to protect?**

What do you **need to protect it from?**

How do you most **effectively protect it?**

INTEGRATED SECURITY

RISK SERVICES

TECHNOLOGY & DATA SERVICES

PEOPLE SERVICES

Drive long-term customer value

PROFESSIONAL PEOPLE SERVICES

Our security professionals are recruited and carefully screened according to their talents, qualifications, experience, temperament and background. Whether a location requires security professionals to protect facilities or respond to incidents, operators or analysts to synthesise data, our team of security professionals is committed to delivering superior customer service.

- ▶ Mobile and Patrol
- ▶ Visitor Management and Access Control
- ▶ Parking Security
- ▶ Critical Asset and Equipment Protection

ESTABLISHED TECHNOLOGY SERVICES

We create solutions to meet each customer's unique requirements using our software and technology partners. This can include our bespoke suite of software and hardware, or can extend to our extensive network of proven technology partners. Our aim is to systematically collect data and produce reports, analysis and insights for our customers.
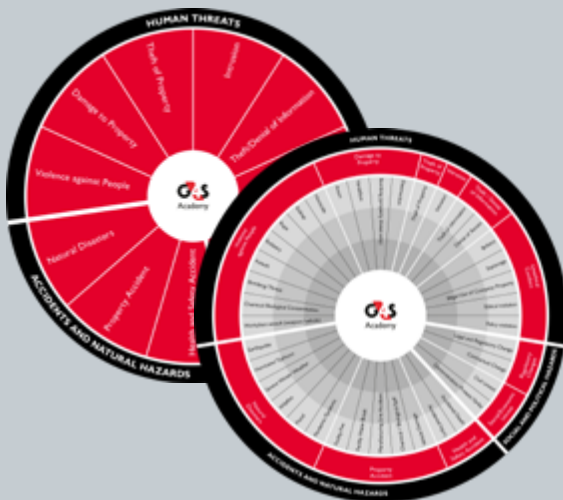

- ▶ Electronic Access Control
- ▶ Emergency Communication
- ▶ Video Surveillance
- ▶ Alarm and Detection Systems
- ▶ Security Operations Centre and Alarm Receiving Centre Monitoring
- ▶ Biometrics
- ▶ Fire Detection & Suppression Systems
- ▶ Design, Installation and Maintenance
- ▶ Cloud Based Systems and Software

MITIGATING RISK SERVICES

We offer education & training, security consulting, design & integration, corporate investigations and risk consulting and management services to help customers improve security awareness and design effective security solutions.

- ▶ Security Consulting
- ▶ Investigations and Intelligence
- ▶ Threat, Disaster, and Emergency Response
- ▶ Executive Protection and Global Travel Services

THE G4S RISK ASSESSMENT

Using our unique Risk-Based Approach, we assist our customers to build, customise and develop security risk management and mitigation programmes that are suited to their individual needs and environments.

We facilitate this through business development risk-based conversations using our G4S Risk Assessment tool, exploring the true security needs of your organisation.

This allows us to identify significant security risk exposures and the options available to help mitigate those risks.

The output of the G4S Risk Assessment is our unique G4S Risk Radar Report which identifies a set of potential risk types that you should pay the most attention to in your security risk management decision-making process.
