## FLEET MANAGEMENT AND REFURBISHMENT SERVICES

### G4S Fleet Management Services

G4S has a long history and demonstrable experience of delivering large scale distributed fleet management and maintenance programmes, for example, through the self-delivery of such services to a 350 strong fleet of soft and armoured vehicles in Iraq. We will establish and operate workshops to maintain or refurbish your fleet assets in complex remote environments, including armoured vehicles.

### ABOUT US

Backed by the global corporate footprint and purchasing power of G4S plc, G4S Risk Management is a leading provider of risk mitigation, secure support services and integrated solutions to governments, international agencies and multinational corporations, wherever they may operate.

### OUR SERVICES

Vehicle Inspection and Maintenance

Vehicle Refurbishment Programmes / upgrades

Preventive maintenance and repairs

International Supply Chain Management Services

Vehicle tracking services / In-vehicle monitoring services

Vehicle Operation and Maintenance Training

### G4S Fleet Management Specialists

**10 years' experience of delivering self-sufficient fleet management and maintenance operations in Iraq, South Sudan and Sierra Leone for national scale fleets of operational vehicles.**

- We manage and maintain large fleets of vehicles and trucks, special-use equipment, motor-cycles, and out-board engines in Sierra Leone, South Sudan and Iraq.
- A Toyota Original Equipment Manufacturer (OEM) standard and international Oil company approved maintenance capability in Iraq.
- Our technicians are trained and accredited to enable them to work safely on general fleet assets, armour and special-use equipment such as Remotely Operated Vehicles (ROV) used in mechanical demining processes.
- Servicing and supply chain processes are managed on bespoke enterprise resource planning (ERP) software, which enables us to forecast servicing intervals and spares demand accurately, which is a significant value driver for customers operating in punitive operating environments with minimal road transport infrastructure, degraded roads and track surfaces.

# G4S Risk Management

## Our Vision

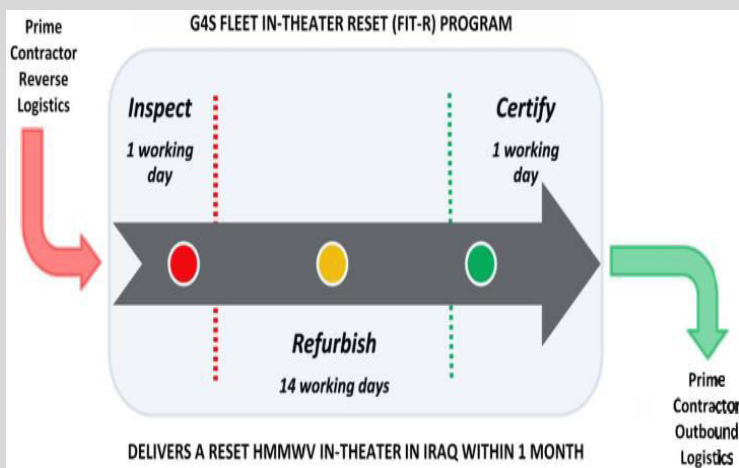

To become the leading partner of choice for the provision of broad spectrum risk management and support services in complex, low-infrastructure and challenging environments.

## Our Mission

We will design, deliver and execute cost efficient risk management support services that enable our customers to conduct their business safely and successfully in complex, low-infrastructure and challenging environments.

## G4S Fleet In-Theater RESET (FIT-R)

- G4S Fleet In-Theater RESET (FIT-R) is a high ROI program to refurbish military vehicles including fleets of HMMWVs and M2 Bradley IFVs.
- The FIT-R program models delivery of a refurbished HMMWV, Bradley or similar, with a delivery back period of 1 month promoting sustainable improvements to performance, reliability and safety.
- OEM relationships, dealer franchise networks, road, sea and air-freight shipping capacity, and supply chain logistics for major components and spares are established in GCC countries.
- Workshop infrastructure and technician capacity are available in Iraq, with spare capacity in Kuwait and UAE to enhance operational scale and efficiency, and also to add resilience.
