

## G4S CANADA PROTECTING PATIENTS, FACILITIES & STAFF

**The rapidly-changing dynamics of the healthcare system are creating new and unique security challenges.** Hospitals and healthcare facilities are some of the most active public places in Canada, and include high-value equipment, accessibility to drugs, many entrances and ease of movement around the building and premises. The challenges of protecting patients, employees and property while maintaining privacy and continuity of care in an open environment demand a partner with the experience and ability to create customized security programs that fit unique budgets, layouts, and security needs.

G4S is Canada's leading security solutions company, offering integrated security services to clients in a wide range of industries. For our clients in the healthcare sector, we have developed an exclusive package of service offerings that fully integrates all aspects of the security program, including security personnel services with highly-specialized, sector-specific training and customized secure technology solutions.

We are proud to be a Canadian company servicing the security needs of Canadian institutions and the Canadian public. We work with thousands of clients across the country, and are the employer of choice for security professionals in Canada.

With G4S Canada as your security partner, you can rest assured that we will deliver a full, end-to-end security solution that meets your specific needs. We provide hospital and healthcare facilities across the country with integrated security systems, technology and services to support facilities, mitigate risk and safety concerns, and maintain compliance within a caring and supportive environment.

Let us help you to see the opportunities that exist in the challenge of securing your world.

The rapidly changing dynamics of healthcare facilities are creating new challenges for experienced and prepared security companies.

### Security Personnel

The Tier 1 Patient Care Specialist can be deployed across a broad spectrum of basic patient care environments, and is trained in Patient Watch / Constant Observation, Infection and Access Control Support.

The Tier 2 Healthcare Professional undergoes additional training and achieves professional designations through the International Association of Healthcare Security & Safety (IAHSS) to prepare for today's evolving healthcare environments.

The Tier 3 High-Risk Officer (HRO), normally positioned in mental health or emergency settings, provides a proven program that reduces the number and risk of violent incidents.

new and unique challenges for security professionals. G4S is the most  
company serving the Canadian healthcare sector.

### Secure Technology Solutions

G4S understands the unique technology needs of the healthcare sector. We work with leading manufacturers to provide cost-effective, reliable and scalable solutions that secure patients, staff and essential supplies. Our service solutions for our healthcare clients include:

- Nurse call alert
- Resident/patient locator and supervision
- IP-based intercom or video/intercom
- Access control
- ID badges
- Drug control
- IP-based video systems
- Vehicle/pedestrian management

## Risk Consultancy

G4S is trusted by a number of the country's leading organizations to provide expertise and consultancy advice in a variety of fields. We offer world-class solutions to match evolving requirements, particularly in environments, such as healthcare, that are complex or sensitive. By working closely with our clients to understand their goals and security needs, we can enable them to operate confidently and securely.

We employ a uniquely credentialed, experienced and multi-disciplinary team of risk consultants who understand the pressures their clients face and are committed to working in partnership to devise and implement effective solutions to their complex security issues and risks. Our services include:

- Intelligence advisory services
- Risk assessments and security audits
- Threat and risk mitigation
- Business resilience
- Travel risk management
- Crisis management and response
