

# Remote Concierge

Finding the right security solution to fit your needs can be a challenge. Security threats are diverse and constantly changing, and the need to control costs has never been more pressing. At G4S, we have decades of experience in delivering comprehensive security solutions that integrate technology with physical security to protect people and property and produce a return on investment.

Provided by UCIT Online Security, Remote Concierge combines video collaboration with equipment, remotely-managed access control and other technologies to remotely manage your building and provide on-demand customer service.

## Services

Remote Concierge uses state-of-the-art technology to complement on-site security personnel at a fraction of the cost. Our full package of integrated technology services enhances your security profile while effectively managing your building.

## When is Remote Concierge Appropriate?

1. Your building is looking to more effectively manage resources and reduce expenses while maintaining the highest level of security and service.
2. Your building has only partial security coverage and/or has experienced issues when the building is unattended.
3. Your building is too large or too complex for cost-effective security personnel coverage, and an integrated solution is needed to manage your security.

Surveillance

Monitoring & Maintenance

Emergency Services

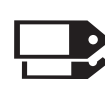

Access Control

Documenting & Reporting

Parking Passes & Enforcement

Package Management
