

Transport/Logistics Security

G4S understands the diverse and often challenging needs in the transport & logistics environment, from protecting high-value goods to managing high volumes of vehicle and personnel traffic. G4S provides the most extensive security personnel training available and ensures that our programs adhere to the highest training standards.

G4S offers our transport & logistics clients a strategic blend of experienced risk management, technology integration, security personnel and software service offerings, which fully integrates all aspects of the security program.

Corporate Risk Services

G4S Corporate Risk Services offers a complete suite of consulting services for assessing, refining and developing your existing security program. Our range of services covers all aspects of protection, management of aggressive behaviour and challenging security matters facing healthcare environments today.

Secure Integration

We pride ourselves on providing technology solutions and superior customer service to support and enhance our clients' security program. We pride ourselves on the availability and expertise of our team, and ensure our solutions integrate fully with existing systems.

Security Personnel

G4S security professionals are carefully screened, background checked and recruited according to qualifications, experience and disposition. Our security program uses the latest technology to increase security professionals' efficiency.
