

G4S SERVICE SOLUTIONS

Rapid Surveillance Technology

Self-Powered Hardware — Reliable Surveillance

The D3 is the first of its kind Cloud+Edge Security Platform-as-a-Service that provides a full turn-key solution for perimeter detection, deterrence, and alerting to one or many Command Center(s). In a portable, easy to deploy and take down solution, this is your one-stop A to Z solution. You simply set it up on site, turn it on, and you're done! The D3's features include:

- **Live monitoring and on-site response**
- Complete security solution
- Cloud-based automated alerts (email, sms)
- Two-way loud speaker
- Active deterrence (flood light, speaker, strobe)
- 24/7 video recording
- Tamper-resistant battery backup system
- Thermal camera analytic intruder detection
- Alert management command center
- Live streaming video via cellular & satellite
- Self-sufficient power management
- Low maintenance
- iOS and android apps

We make it practical and cost effective to add the industry's most reliable and complete video surveillance and monitoring solutions—without investing in expensive equipment or dealing with ongoing maintenance.

With a unique combination of solar powered “work anywhere” systems, intelligent software, convenient cloud-based access, and professional service, G4S is ready to help you offer video surveillance solutions that cost less and set you apart from the competition.
