

G4S Secure Integration owns and operates a UL Listed and CSAA 5 Diamond Certified Monitoring Center that uses advanced technology to protect critical assets and people. Acting as an extra set of eyes, the highly trained Monitoring Center staff helps to provide peace of mind for our clients.

G4S MONITORING CENTER VIRTUAL CHAPERONE

What is a Virtual Chaperone?

Using remotely monitored cameras and audio, the G4S staff helps to ensure the safety of your employees and visitors by watching them as they enter or exit your facility or as they work in a remote or hazardous area. Custom audio announcements can be used to alert people that the area is being monitored by live operators. This service can be provided on-demand, or as a part of a more comprehensive security services strategy.

What does a Virtual Chaperone do for you?

- Maximizes the efficiency of existing guard staff.
- Reduces the need for a guard during off hours.
- Provides an additional layer of protection for persons with disabilities, or persons in hazardous weather.
- Allows for employee and contractor supervision.

Ideal Applications of a Virtual Chaperone:

- Office Buildings
- Healthcare Facilities/Hospitals
- Parking Lots and Garages
- Retail Establishments
- Remote Utility Sites
