

## OTHER FORMS OF GUARDING AND PROTECTION

### PREMISES WITHOUT PHYSICAL GUARDING

- » Premises are usually only mechanically and technically secured and physical guarding is not performed either in working or off-working time. If the premises are connected to the Centralized Protection Desk, Monitoring Center, SGS intervenes when alarm is sounded. The premises can be provided additional guarding if damage is discovered. Clients can use the service upon request or above-standard service.

### MOBILE MONITORING

- » It is inspection monitoring on foot, by public transport or by car in a specific area of a city where the contractual premises are. The service is usually provided during off-working hours of the premises. The guard visits these premises in an irregular order and times. Surface inspection (whether entrances, windows, and glass surfaces are undamaged, locked, etc.). Or internal space inspection is performed.
- » The time of inspection depends on the premises size and the extent of inspection required (surface, internal space, etc.). It can usually range from 5 minutes up to 30-40 minutes. The premises to be inspected do not have to be buildings only but also various equipment installed in a city, etc.

### ACTION OF AN INTERVENTION GROUP UPON AN ALARM

- » It is guarding upon a signal received by Centralized Protection Desk, Monitoring Center of G4S when intervention group goes to the premises in question. In the case of damage, the cooperation with the Police of the CR is arranged. Upon the owner's request additional guarding is provided before the problems are removed.

### TRANSPORT OF CONSIGNMENTS – COLLECTION OF COMPANY POST

- » These are services of company post between client's premises in one city or in a certain area (more cities). This service can also provide collection and delivery of post to the Czech Post Office or other consignment transport company. It is not a courier service.
