

Environmental Policy Statement

G4S Facilities Management (UK) Limited

As a leading FM service provider, G4S Facilities Management [G4S FM] recognises that its business activities can lead to both direct and indirect impacts upon the local and global environment. Furthermore, G4S FM acknowledges the value of managing those impacts and alongside our suppliers, we actively seek to work in partnership with our customers and stakeholders to consider the impacts associated with the business and to mitigate against or to effectively manage them accordingly.

These considerations form part of the core values held by G4S FM and the company is committed to comply with all applicable legislation and any other compliance obligations, as appropriate to the business for the protection of the environment. In addition, G4S FM has a commitment to the prevention of pollution to land, air or watercourse through any uncontrolled event or discharge. G4S FM is committed to continually improve its Environmental management System which aligns to the ISO 14001 Environmental Management standard. G4S FM aspires to further minimise and mitigate any (negative), environmental impacts by committing to;

- Achieving Carbon Net Zero by 2050 at the latest,
- Continual improvement to enhance environmental performance wherever practicable,
- Encouraging environmental awareness amongst those working for, or on behalf of, G4S (FM) through effective training and communication
- Promote the efficient use of resources through minimisation of waste, achieved through the effective use of the waste hierarchy, encouraging reuse and recycling
- Sharing of environmental information with clients, contract stakeholders to actively achieve environmental best practice were found to be relevant to our certified contract management systems

In all of our work streams delivering facilities management services we will work to these commitments and annually review our progress against them. We will set clear objectives for environmental improvement. The specific objectives are set for each business year, taking into account risks and opportunities identified by our review of environmental aspects, relevant experience of other G4S companies, and the direction set by our regional and global leadership. We will review progress of those set specifically for G4S FM, as well as against the wider environmental targets set and reported upon by G4S Allied Universal®.

This Environmental Policy Statement is publicly available on our external website and is communicated internally via our intranet and internal briefings to our people and communicated to our contractors as part of contract documentation.

Signed

Jennifer Littlewood
Managing Director, G4S Facilities Management & Public Services
