

## Cabinet Office: PPN06/21 Carbon Reduction Plan

**Supplier Name:** G4S Facilities Management (UK)

Incorporating: G4S Facilities Management (UK) Ltd, G4S Health Services Ltd, G4S Government and Outsourcing Services (UK) Ltd

**Publication Date:** 15th July 2025

### Commitment to Achieving Net-Zero

G4S Facilities Management has committed to achieving net-zero carbon emissions by 2050 or sooner.

(See [Allied Universal Global ESG Report 2024](#)).

### Baseline Emissions Footprint

*Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.*

**Baseline Year:** 2020

Additional Details relating to the Baseline Emissions calculations.

G4S has reported on its scope 1 and scope 2 GHG emissions and its overall progress against carbon intensity targets since 2008.

In 2021, following an external review conducted by [Corporate Citizenship](#) and further improvements to data gathering and quality, G4S UK and Ireland region selected 2020 as its emissions baseline.

G4S' emissions footprint has been calculated with a financial control approach.

| Emissions | Total (t/CO <sub>2</sub> e)                        |
|-----------|--|
| Scope 1   | 4,080  |
| Scope 2   | 6.4 (location-based)<br>7.2 (market-based)         |
| Scope 3   | (4) Upstream transportation and distribution: 83.2 |

## Cabinet Office: PPN06/21

### Carbon Reduction Plan

|  |  |
|--|--|
| <p><b>Scope 3</b></p> <p><i>Categories defined by the PPN06/21 technical standard</i></p>                                | <p>(4) Upstream transportation and distribution: 70.3</p> <p>(5) Waste generated in operations: 749.3*</p> <p>(6) Business travel: 60.7</p> <p>(7) Employee commuting: 898.3</p> <p>(9) Downstream transportation and distribution: N/A</p> <p><i>Category 9 is not materially relevant to G4S Facilities Management (UK), as the business does not transport or distribute any significant goods or products to other parties.</i></p> <p><i>* In baseline reporting relevant emissions based on spend were reported as part of Purchased Goods &amp; Services. This change is a reflection of the improvements to categorisation, in line with the GHG Protocol</i></p> <p>Total scope 3: 27,416</p> <p><i>Categories 1 and 2 accounted for approximately 70% of total scope 3 emissions in the reporting year..</i></p> |
| <p><b>Total Emissions</b></p> <p><i>Scopes 1 and 2 and scope 3 categories defined by PPN06/21 technical standard</i></p> | <p>4,663 (location-based)</p> <p>4,650 (market-based)</p>  |

### Emissions Reduction Targets

To continue our progress to achieving net-zero, we have adopted the following science-based carbon reduction targets.

- By 2030, G4S UK and Ireland will reduce its absolute scope 1 and scope 2 GHG emissions by at least 42% and scope 3\* from purchased goods and services and capital goods by 25%.

*\*Purchased goods and services and capital goods represent c.80% of G4S UK's baseline scope 3 emissions).*

- By 2050, or sooner, our goal is to meet all net-zero global targets.

### Carbon Reduction Projects

#### - Completed Carbon Reduction Initiatives

*The following environmental management measures and projects have been completed or implemented since the 2020 baseline:*

Since 2021, G4S businesses within the UK have procured electricity backed by REGOs to ensure 100% of our electricity supply is renewable. During 2024, this has resulted in savings of over 12 t/CO<sub>2</sub>e compared to the equivalent if non-renewable electricity sources had been used by G4S buildings ..

While G4S Facilities Management no longer has any building stock under its direct control those clients both inside and outside G4S benefit from the approach to renewable energy.

In 2021, G4S UK and Ireland region implemented a new company car policy, focused on the future use of electric-only cars. By the end of 2024, almost 55% of the G4S Facilities Management fleet consisted of low-emission vehicles (EV:22%), with fleet-based emissions decreasing by 18% since 2020.

As part of a global partnership to explore low carbon solutions, Shell Mobility and Fleet Solutions is providing G4S UK and Ireland with countrywide public electric vehicle charging infrastructure.

At a more local level, advice is given to staff on improving vehicle fuel efficiency, through improved driving style, removal of excess weight from vehicles, and by ensuring that tyre pressures and other maintenance is correctly maintained. In addition, staff are reminded to avoid waste by turning off lights (where motion sensors are not already fitted) and by closing down other electrical equipment when not in use.

#### - Future Carbon Reduction Initiatives

We recognise that decarbonisation plans must be developed and adopted in line with credible evidence-based reduction pathways.

Measures likely to be included across the region are:

- Transitioning fleet vehicles (leased) to ultra-low emission vehicles, where infrastructure, cost, and technology permit.
- Seeking further opportunities to reduce energy consumption, including continuing programmes to replace our existing lighting infrastructure with LED.
- To reduce emissions from our supply chain by at least 25% by 2030, we must challenge, educate and work with the suppliers we use across the UK with robust measures, targets and policies.

## Cabinet Office: PPN06/21 Carbon Reduction Plan

### Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### Signed on behalf of the Supplier:

.....

Jennifer Littlewood  
Managing Director  
G4S Facilities Management (UK)

Date: 15th July 2025
