

# GENDER PAY GAP REPORT 2023

This is our 6th gender pay gap report setting out the pay and bonus gap between men and women in the 12 business entities within scope of the regulations. One additional business (Total Security Services TSS) has been added to the total number of businesses in the report. This entity was reported separately in 2022 as it was only acquired in the year.

Overall, 5 of the businesses show a smaller gender pay gap compared to 2022. Compared to 2022, we have more women at senior levels in several businesses and this has contributed to the narrowing of the gap.

Last year we focussed our strategy on narrowing the gaps through recruitment and developing and retaining more women in our businesses not just at the senior levels but at all levels. This focus was part of our broader commitment to our diversity, equity and inclusion (DE&I) objectives.

From a recruitment perspective, we continued our review of the resourcing processes with an emphasis on diversity, equity and inclusion (DE&I). In identifying applicants we considered carefully how we were attracting candidates, as well as the organisations we engaged with, to help with this work. We also refreshed what we say and display in our marketing of roles to allow greater diversity in our interview shortlists.

During the year, our UK&I Inclusion Council matured and is building a better understanding of the importance of DE&I. This council is at the heart of our Company's value on caring. This value underpins everyone feeling valued for their contribution and views, and champions the principle of all voices being heard. This year we carried out our first DE&I Survey, the results of which are both informing our actions and helping support a gender balanced pipeline of talented people joining and staying with our organisation.

Also during the year all our businesses embarked on our I-Care Leadership programme which focused on the commitment to the caring value at supervisory, management and leadership levels. This programme has now been rolled out to the majority of our leadership.

One of the qualitative measures of inclusion comes from our Employee Engagement or Pulse Survey. Our most recent feedback shows that engagement levels remain at a very high level for our female population with positive scores of 81% seen in our most recent survey. This feedback together with other metrics being gathered from our DE&I Survey is providing our Inclusion Council with valuable insight which is helping target efforts on recruiting, developing and retaining more people from all under-represented groups, including women.

Driving a more diverse and inclusive organisation is crucial for both the ongoing success and longer term sustainability of our organisation. As such we continue to strive to attract more diverse candidates to join our businesses and to create an environment where everyone feels they have a part to play and are able to share their ideas in building the organisation for the future.

I confirm that the data provided has been collated in accordance with the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017.

**Paul Edwards**  
Regional HR Director G4S UK&I

## Calculating the mean difference

The mean percentage pay gap is calculated by adding up the total hourly pay for all women, and dividing it by the number of women employed. This figure is subtracted from the same calculation for all the men to identify the gap.

## Calculating the median difference

The median is the middle value when all of the hourly rates of pay for women and men are separately ranked.
