Securing Your World

Technology Enhanced Security
for Commercial Premises

CCTV Surveillance

We provide tailor made CCTV surveillance solutions to meet your exact requirements. Cameras can be installed to view specific areas such as access doors, reception, stairways, office areas and parking.

Working on either IP or Analogue technology, you can be assured of picture clarity and enhanced security for your office or residence.

24 Hr Monitoring Services

We specialize in event-driven, off site monitoring of alarms, CCTV and electronic security systems.

Our central monitoring centre monitors and coordinates the effective response to security, fire and medical emergencies 24 hours a day, 7 days a week, so you can rest assured.

Intruder and Fire Alarm Systems

Our intruder and fire alarm systems ensure automatic detection of unauthorized access and fire.

To verify the alarm we can link to a video detection system that you can view on your phone wherever you are. All systems are monitored around the clock at our central alarm station.

Security Services

We provide manned security services to assist in ensuring access is controlled, parking is regulated and losses are prevented.

Our officers are trained as fire wardens, medical first responders and assist with health and safety monitoring and customer care.

Driver Behaviour Monitoring

We track vehicles 24/7 and monitor the behaviour of drivers to promote safe driving and reduce fuel and maintenance costs.

We provide real-time information on vehicle location and speed.

Training Services

We are an approved training centre and offer a variety of courses including defensive driving, fire prevention, first aid and loss prevention.

Access Control Systems

Our access control systems include biometric, keypad, proximity, turnstile and speed gate solutions.

Visitor Management Systems

Our visitor management systems offer both visitor operated kiosks and receptionist generated badging solutions.

Receptionist Services

G4S receptionists have excellent communication and people skills combined with specialist expertise in safety and security.

They will control access, process visitors and calls, and if required, will monitor CCTV systems and staff time and attendance.

Personnel Background Vetting

By outsourcing screening and vetting to G4S you can be assured of the identity and residence of your personnel and domestic staff. For more sensitive posts, we can also check for criminal records with the local police.

Secure Transportation & Protocol Services

We provide executive, staff and crew transportation services. Drivers and Commanders are trained in advanced driving and close protection and vehicles are equipped with mobile communications, tracking, trauma kits and extinguishers.

Our airport meet-and-greet service ensures a smooth passage through the airport. We provide assistance through immigration, or in the baggage hall or simply on arrival to escort passengers to awaiting vehicles.

Risk Advisory Services

G4S provides security advice, risk assessments, mitigation strategies and integrated solutions. We ensure you consider the risks and offer solutions to mitigate them wherever possible.

As the World's leading security provider, we combine local knowledge with international best practice to prepare pragmatic and effective security plans and procedures.
