

Securing Your World

Stop the Spread.

**Break the Chain
with Microbial
Aerial Disinfection.**

Specialised sanitising and disinfecting services for office and commercial spaces.

Microbial Aerial Disinfection, using ULV machine, is anti-virus and anti-bacterial and is designed to target and eliminate harmful microbes.

Professional approach:

Only highly trained staff using best-in-class products and equipped with adequate personal protective gear, perform designated tasks.

Safe and effective:

Ultra low volume method to ensure minimum use of chemical for maximum impact.

Highly effective in eliminating viruses including H1N1 and Coronavirus, and over 400 strains of bacteria.

G4S expertise:

Our experts conduct a detailed needs analysis of each customer site, identify hygiene requirements and structure an appropriate plan, delivered through proven processes.
