SECURITY PERSONNEL

Respond.
Report.
Protect.
Prevent.

G4S provides a range of security personnel services:

- Static guarding services
- Alarm response
- Concierge and valet services
- Corporate security & investigations
- Elite Protection Professionals (EPPs™)
- Emergency preparedness
- Executive & close protection
- Labour disruption management & planning
- Loss prevention services
- Patrols and mobile services
- Screening services
- Special event coverage

We employ the best of the best

G4S security professionals are carefully screened, background checked and recruited according to qualifications, experience and disposition. The foundation of a security program's success is the quality and performance of the assigned personnel, and we make sure we have the best.

G4S was the first company to introduce experience-based security professional programs to give customers the flexibility to select the right personnel to meet their individual security and customer-service requirements. We offer a variety of programs to meet your needs, and some, such as our Elite Protection Professionals, must have either military or law enforcement experience or a criminal justice degree.

Account management you can count on

Backed by global resources, our extensive network of local and regional offices across Canada brings unmatched security expertise and management right to your doorstep.

Smarter security programs with G4S software

Our security program uses the latest technology to increase security professionals' efficiency. We designed Secure Trax®, our mobile officer-management platform, to allow you to see where your security personnel are and what they are doing at all times. Secure Trax® also provides customized safety and facility inspections, real-time incident reporting and much more.

G4S also offers RISK360™ a software platform that provides customizable incident management and analytics. Developed by G4S in collaboration with customers who wanted a better way to expose and mitigate risk, RISK360™ helps reduce costs and improve business performance.

SECURE INTEGRATION

From integration comes optimization.

Our experienced system designers work closely with our clients to develop the best combination of services for their unique security needs. Our services include:

- Video surveillance, management & analytics
- Access control & visitor management
- Intrusion detection & alarms
- Screening technologies
- Remote monitoring
- Personal locators

We pride ourselves on providing technology solutions that support and enhance our clients' existing technology and security personnel services. Our clients' needs are best met by integrating with existing systems, as well as future-proofing against the continuous improvement and evolution of the technology market.

Our high standards lead the way

G4S partners with our clients to establish security standards and exceed compliance regulations. We provide residential customers with a single source of expertise, and specialize in a variety of industry-leading technologies.

We go beyond systems integration

Our security integration team customizes layered security solutions to meet your specific needs and requirements. We combine our experience in a wide range of technology, products and systems with strict attention to design detail. We back our engineering, technical and management expertise with dependable maintenance support and training to create reliable solutions.

Innovative remote monitoring solutions

Our virtual concierge system combines video collaboration with equipment, remotely-managed access control and other technologies to remotely manage your building and provide on-demand customer service. We complement your on-site security personnel at a fraction of the cost, enhancing your security profile while effectively managing your building.

It all starts with exceptional people

From development and design through installation and ongoing maintenance, we are a true partner, creating sustainable solutions that exceed expectations now and for many years to come.

CORPORATE RISK SERVICES

An abstract background image featuring a complex network of black lines and spheres. Some spheres are dark grey, while others are glowing with green or blue light. The lines connect these spheres, creating a web-like structure that suggests a global or digital network.

Risks come in all shapes and sizes. Be ready for any and all of them.

G4S Corporate Risk Services partners with our clients to deliver tangible benefits and effectively protect residents. Our service offerings include:

- Physical Protection System Design
- Integrated Electronic System Design
- Vulnerability Assessment
- Specification & Procurement Management
- Physical Security Program Management
- Project Management
- Threat Risk Assessment
- Security Program Development
- Security Policies & Standards
- Hazard Assessment
- Security Awareness Programs
- Critical Infrastructure Protection

G4S Corporate Risk Services works closely with our clients to identify, assess and manage threats to their business, turn risk to their advantage and seize opportunities. Our team of security consultants understands the pressures clients face and are committed to working in partnership to devise and implement effective solutions to security challenges.

Physical Security

Public and private sector organizations face risks from many sources, including criminal activity, workplace violence, regulatory compliance and natural hazards. Our team of security consultants is unparalleled in the industry and consists of recognized experts with functional expertise

across multiple competencies.

Security Management

The effectiveness of security management and the appropriateness and sustainability of security programs is critical to the overall success of today's organizations. We bring together certified consultants to ensure that our customers receive the highest level of security management expertise.

Critical Infrastructure Protection

There are 10 sectors designated as Critical Infrastructure in Canada, the protection of which is vital not only to your organization but to the health, safety, security and economic prosperity of our society. G4S Corporate Risk Services has acquired a deep and strong bench of consultants who are recognized experts in the complex discipline of Critical Infrastructure Protection.

G4S works to ensure the safety and security of millions of people worldwide.

As Canada's leading provider of security solutions, we offer a unique combination of services including risk assessments, security personnel, security technologies, screening services and cash management solutions. G4S employs thousands of Canadians and operates in offices across the country.

Welfare and prosperity depend on being able to work, play and live in a safe and secure environment. In a world of diverse and increasing risk, maintaining safe and secure environments can be a complex challenge. At G4S, we believe that in every security challenge there is an opportunity to unlock hidden benefits that can help us to thrive and prosper.

Our wealth of global experience and extensive Canadian expertise provide our clients with customized security solutions that solve their unique security challenges. Using industry-leading expertise, we design and manage service offerings for public and private companies across the country, operating in diverse environments, industries and markets.

Let us help you to see the opportunities that exist in the challenge of securing your world.
