Exactly **how healthy** is your entire security system?

HEALTHCARE

Our diagnosis:

Boost your security immune system, realize some powerful benefits.

We go beyond safe and secure.

Healthcare environments are challenged by a unique set of risks, including workplace violence, drug related crimes, gang violence, infant/child abduction threats, natural disasters and terrorism. All these need to be addressed, but with less intrusive measures that minimize stress to patients and visitors. At G4S, we get it. Through our vast experience and technology, we provide a powerful and proven "immune system" that protects your people and property, while making everyone feel safe and comfortable.

- G4S will conduct a comprehensive security risk assessment and then design a security program customized to your needs, using the latest innovations in security technology.

- We back up our program with the industry's most qualified guard force, specifically trained to work in a healthcare environment.

We make it all better.

By choosing G4S, we will help you meet regulatory compliance.

- We will help you reduce costs by providing an efficient security program.
- We will help to reduce your risks by improving overall operating standards.

We earn your trust.

G4S was built over a century by a dedication to service. Our people are trained to your environment, and know how to perform appropriately within it.

- We act with integrity and respect for ourselves and our clients.
- We are constantly achieving through innovation and teamwork.
