

**Today's world has  
more risk than ever.  
Today's G4S has  
more ways to  
protect you.**

Securing Your World

Compliance  
& Investigations

Systems Integration

AMAG Technology

Security Officers

G4S secures your people, property and assets by understanding and mitigating security risk. We offer a suite of products and services – including risk consulting and investigations, systems integration, security software and technology, and security professionals – that align to deliver innovative, essential and scalable solutions that span your entire operation.

Although each G4S solution is market leading on its own, we can combine our offerings to provide a comprehensive customer experience that delivers real, sustained and measurable value.

# COMPLIANCE & INVESTIGATIONS

**Risks come in all  
shapes and sizes.  
Be ready for any  
and all of them.**

G4S offers a variety  
of corporate risk services:

- Background/Employment Screening
- Intelligence Support & Management
- Risk Assessments
- Security Consulting
- Undercover Operations

## **Risk Consulting**

Whether operating in an office facility, manufacturing plant or multiple international locations, G4S helps protect your assets and safeguards your company's future. By positioning risk management at the forefront of your strategy, you not only protect your physical assets, but also your employees, customers and strategic business information.

## **Corporate Investigations**

Our experts establish the facts to determine cause, identify wrongdoing and curtail and recover losses to protect your bottom line and brand integrity. We work closely with executives, senior management and legal counsel to evaluate each situation, pinpoint objectives and develop a strategy. This enables us to identify information, sources and loss responsibility while gathering evidence to support civil, criminal or regulatory action.

## **Executive Protection**

In today's world, executives, dignitaries, high-profile individuals and their families are at an increased risk of assault, kidnapping and other threats. G4S has the global expertise to minimize risk while maintaining a daily routine. Our experts come from the military, law enforcement and private sector. They are held to the highest standards and have skills honed through extensive training and real-world experience.

## **Information Protection & Intellectual Property**

Illicit activities siphon profits and erode the integrity of organizations. G4S identifies business risks and implements solutions to prevent losses and maintain the integrity of your information, brand, reputation and intellectual property rights.

# SYSTEMS INTEGRATION

**From integration  
comes optimization.**

G4S designs and delivers  
cutting-edge solutions:

- Communication Networks
- Electronic Security
- Monitoring Services
- Systems Integration
- Video Surveillance

G4S brings your systems together. We design, construct and maintain stand-alone and integrated security systems and communication networks. A trusted partner to customers and suppliers, G4S takes great pride in delivering outstanding expertise and superior service. Our knowledge of a wide range of technologies, products and systems provides cost-effective, reliable and scalable solutions.

#### **Successful collaboration leads to results**

G4S is known in the industry for our proven experience as an established, large-scale systems integrator providing security and communication solutions. We collaborate with you to effectively mitigate risk and maximize return on investment.

#### **Our high standards lead the way**

G4S partners with you to establish security standards and exceed compliance regulations. We provide commercial, industrial and government customers with a single source of expertise, and specialize in a variety of vertical markets.

#### **We go beyond systems integration**

Our security integration team customizes layered security solutions to meet your specific needs and requirements. We have experience in a wide range of technology, products and systems that we combine with our strict attention to design detail. We back our engineering, technical and management expertise with dependable maintenance support and training to create cutting-edge, reliable solutions.

#### **It all starts with exceptional people**

From development and design through installation and ongoing maintenance, we are a true partner, creating sustainable solutions that exceed expectations both now, and for many years to come.

AMAG  
TECHNOLOGY

Because the state  
of our world  
calls for  
state-of-the-art  
electronic security.

AMAG Technology provides  
a number of products and solutions:

- Access Control
- Credential Authentication
- Geospatial Incident Mapping
- Incident Management
- Site Profile Management
- Video & Video Management
- Visitor Management

**Our scalable solutions are cost-efficient**

We earned our reputation in the market for our Symmetry access control platform, and today we are known for building complete, end-to-end solutions for our customers that meet all their system needs. We deliver identity management, alarm handling, visitor management, video management, mobile applications and policy-based solutions for industry-specific reporting and compliance.

**Our customers know we offer many advantages**

While we maintain our independent relationship, we can draw upon the global resources available from G4S to enhance our service offerings. Our experienced, professional team provides exceptional customer service for clients in the US and around the world..

**Our platform lets you grow to meet your changing needs**

Symmetry is flexible, cost-effective and easy to use, making it the perfect choice for organizations of any size. Our open integrations to third-party products for audio, fault tolerant applications, HR reporting, a wide range of HD cameras, biometrics and much more allow for a complete, scalable solution. With Symmetry, your system can start small and grow seamlessly to meet the needs of your organization, so that you can meet industry compliance requirements while keeping your premises secure and your people safe.

# SECURITY OFFICERS

**Respond.**  
**Report.**  
**Protect.**  
**Prevent.**

G4S security officers create significant value for customers through our people, account management, software and innovative programs. Whether your location involves extensive customer interaction or significant security challenges, we have the right personnel for the job.

G4S provides several types of security officers to meet your needs:

- Bank Protection Officer
- Custom Protection Officer
- Property Resource Officer
- Upscale Security Officer

## **We employ the best of the best**

G4S security officers are carefully screened, background checked and recruited according to qualifications, experience and disposition. We understand that the foundation of a security program's success is the quality and performance of the assigned personnel.

G4S was the first company to introduce experience-based officer programs to give customers the flexibility to select the right officers to meet their individual security and customer-service requirements. We offer a variety of programs to meet your needs, including our elite Custom Protection Officers®, who must have either military or law enforcement experience or a criminal justice degree.

## **Account management you can count on**

Backed by global resources, our extensive network of local and regional offices across the US brings unmatched security expertise and management right to your doorstep.

## **Smarter security programs with G4S software**

Our security program uses the latest technology to increase security officers' efficiency. We designed Secure Trax®, our mobile officer-management platform, that allows you to see where and what your officers are doing at all times. SecureTrax also provides customized safety and facility inspections, real-time incident reporting and much more.

G4S also offers RISK 360™, a software platform that provides customizable incident management and analytics. Developed by G4S in collaboration with customers who wanted a better way to expose and mitigate risk, RISK360 helps reduce costs and improve business performance.
